Professional Summary

Analytical B.Tech graduate from IIT Jammu specializing in Python, SQL (PostgreSQL), and Power BI data modeling. Proven track record of handling 100K+ record datasets, building relational database pipelines, and creating interactive KPI dashboards. Seeking a Data Analyst role to deliver data-driven business insights.

Technical Skills

- Data Analysis:** Python, Pandas, NumPy, Microsoft Excel (Pivot Tables, Charts, Dashboards, Data Cleaning, Data Wrangling)
- Database & SQL:** SQL (Queries, Filtering, Aggregations, GROUP BY, JOINS, CTEs, Subqueries, CASE Statements), PostgreSQL, Relational Databases
- Business Intelligence & Visualization:** Power BI (Dashboard Design, Data Visualization, Ad Hoc Reporting), KPI Tracking, Trend Analysis
- Tools & Version Control:** Git, GitHub, Jupyter Notebook, VS Code
- Core Competencies:** Data Cleaning, Data Validation, Data Integrity, Data-Driven Decision Making, Business Intelligence Reporting, Cross-Functional Collaboration

Data Analytics Projects

UPI Transactions Analytics [\[GitHub\]](#)

Data Analyst / BI Developer

- Analyzed a 100K+ record UPI transaction dataset using Python (Pandas), SQL, and Power BI to uncover transactional velocity, peak payment hours, and user behavior trends.
- Executed data cleaning, filtering, grouping, and aggregations in Python and SQL to conduct exploratory data analysis (EDA) and isolate high-volume transaction segments.
- Developed an interactive Power BI dashboard to visualize transaction patterns and support data-driven decision-making.
- Engineered a clean project repository on GitHub containing Python notebooks, modular SQL scripts, dataset assets, and project documentation.

E-commerce Customer Analytics [\[GitHub\]](#)

Data Analyst

- Evaluated the 9,994-row Superstore retail dataset using Python, Pandas, PostgreSQL, and SQL to analyze profitability, customer purchasing behavior, and regional sales distribution.
- Integrated Python analysis directly with PostgreSQL to construct a seamless, end-to-end data pipeline from raw ingestion to database storage.
- Engineered CTE-based SQL queries, multi-table JOINS, and targeted aggregations to extract strategic insights on product category margins and order volume.

Bank Customer & Transaction Analytics [\[GitHub\]](#)

Data Analyst / BI Developer

- Built an end-to-end relational database pipeline mapping 500 customers across 5,000 transaction records in PostgreSQL using primary and foreign key constraints.
- Synthesized relational financial data using Python (Pandas, NumPy) to model realistic customer demographics, transaction types, and spending activity.
- Developed an interactive Power BI dashboard visualizing customer lifetime value, spending categories, top-tier clients, and regional metrics.

Professional Experience

Glatrix Biotech Private Limited

May 2026 – Jul 2026

Industrial Intern

Hyderabad

- Collected and structured operational batch data across manufacturing workflows to assist process monitoring and quality tracking.
- Analyzed key quality control parameters and failure variance, helping identify operational trends to support defect reduction.
- Collaborated with cross-functional engineering teams to evaluate workflow inefficiencies and propose data-backed process improvements.

Education

IIT Jammu

May 2026

B.Tech in Materials and Metallurgical Engineering

Achievements

- Awarded the National Scholarship Portal (NSP) Fellowship by the Government of India (2023)
- Qualified JEE Advanced 2022 for admission to IIT Jammu; ranked 2nd, 10th Standard Boards (9.7 CGPA)

Extracurricular Activities

- Represented IIT Jammu in Inter-IIT Volleyball (2023, 2024); ranked 4th of 23 IITs, Sports Meet 2024
